

`<span style="color:red;font-weight: bold;">I can't decide if the Repository should be named with or without the 'LS. Here are both options...</span>.`

The `<dfn #lemma><i :la>Ad Hoc</i> Tags plugin</dfn>` gives `<b important>flexibility</b>` in using `<abbr "HyperText Markup Language">HTML</abbr>` tags, without the `<u error>hasle</u>` and potential security problems of enabling full `<abbr>HTML</abbr>` syntax.
